

COMPLETE LABORATORY SOLUTION

Introducing LIMS by Chikpea Technology at work for you

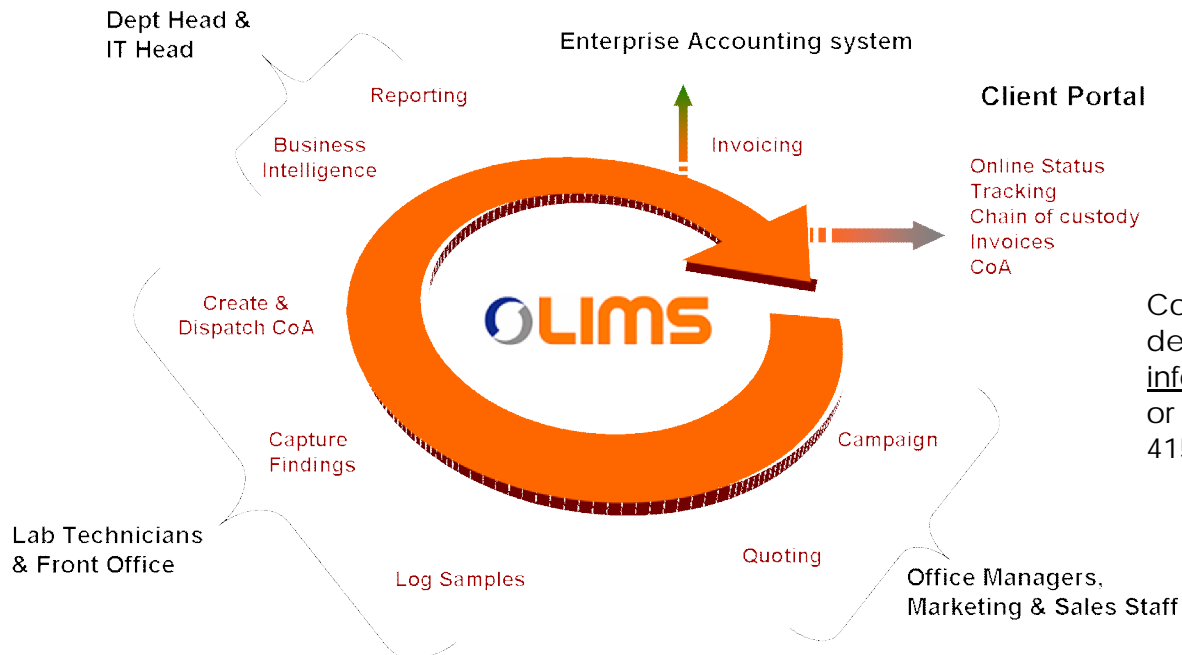

Chikpea LIMS is designed to work with the way your lab operates, not replace it. By using a basic workflow model, an easy to use template based reporting tool, and web based architecture, LIMS allows the front office and the back office to work together. No software to be installed at each workstation. No hardcoded analysis forms or extensive administration. With a minimal amount of data implementation, your entire lab is up and running. With Chikpea, its LIMS made simple. Customize reports to the way your business operates. Integrate multiple facilities through a centralized web database accesses through secure https.

Easy to deploy – 100% web means you can have a local web server or use a hosted platform on the web

Simple to use – based off on requests, the system follows the normal progress any request would take

Flexible to configure – extend the workflow to more or less restrictive, pre-build all the analysis templates and the report templates.

One data source supporting all Lab Activities
